REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art teaches compositions with antioxidants and coupling agents wherein the two components react with each other, but the requirements of a molecular melt of the two components is not taught as this requirement is defined in the specification. The breadth of the terms has been discussed in the parent application and it has been determined that, in light of the definitions for each term in the specification, the enablement is sufficient, since the antioxidants are defined as those for control of polymers and the coupling agents are restricted to those with specific limited functionalities. The prior art is silent as to a molecular melt with these components. Applicants' claims are, therefore, both novel and unobvious over the closest prior art as cited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bernard Lipman whose telephone number is 571-272-1105. The examiner can normally be reached on 8-5 Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on 571-272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
